The preliminary Report on Bulgarian Agriculture by [REDACTED] which you forwarded 6 November 1957, has been reviewed and is considered to be an excellent report. [REDACTED] should be commended for his prompt and scholarly answers to our questions about his observations of Bulgaria's agriculture, made during his tour of that country with the ECE study group, September 14-27, 1957. [REDACTED] broad knowledge of agriculture was used to good advantage. The completeness of the report is notable in view of the fast-moving schedule which covered only a short period of time. This is one of the best responses to date to requirements, issued by us, on delegations travelling in Bloc countries.
